

'HOT TOPICS' GP Update COURSE

Course Organisers: Drs Simon Curtis & Barrie Ferguson

A one day course to bring you up to date and to act as a platform for your CPD as we move towards revalidation.

'Truly amazing course! Imaginative, informative and relevant. Thank you!'

'Stimulating, informative, infinitely useful'

'An excellent course, a master-class in the execution of teaching'

'Inspiring' 'motivating' 'empowering'

For 12 years this popular, highly acclaimed and independent **'Hot Topics'** course has been helping busy GPs with the increasingly difficult task of keeping up with all the new developments, papers and guidelines that are relevant to our daily work. The course will update and refresh you, and also help you create a platform from which you can build your learning portfolio for **revalidation**. The course is prepared and presented by fellow GPs and gives an accessible digest of the recent literature based on what we need to know in the reality of daily General Practice. The course is ideal for the following groups:

- **Busy, working GPs wanting an update of recent developments**

'in 35 years, the best training day I have ever attended!'

'great for a busy GP who wants to read the journals but is just too tired at the end of the day!'

- **GPs preparing for their appraisal and revalidation**

'essential for CPD', 'as an appraiser I will recommend this to all my appraisees'

'How can we persuade all GPs to do your course? It is brilliant and should be part of mandatory revalidation'

- **Candidates preparing for the nMRCGP AKT**

'Best revision tool I've seen for nMRCGP' 'Excellent revision tool for the AKT'

- **Doctors returning from maternity leave or career-breaks**

'after maternity leave a great overview, update and confidence booster'

'stimulating, and I feel excited about going back to GP after 2 years out. Thank you!'

- **Trainers**

'as a trainer, I keep coming back, absolutely excellent and I recommend it to all'

- **Practice Nurses & Nurse Practitioners managing chronic disease**

The material is constantly up-dated with emphasis on the **most recent developments** making it suitable for delegates who have attended in previous years (*'My 5th time – brilliant and different again'*). Simon and Barrie are working GPs who are experienced teachers and lecturers. They are aware of the need to balance information with a pragmatic approach that is relevant to primary care and they ensure that the day is a relaxed, entertaining and enjoyable learning experience. Accompanying the course is a detailed bound **booklet & CD** with information summarising all the clinical **Hot Topics** and additional revision material suitable for AKT candidates.

Please see our web-site www.nbmedical.co.uk for more information.
