HOT TOPICS Ireland: GP Update COURSE

Course Organisers: Drs Simon Curtis and Barrie Ferguson
CME applied for

'We aim to bring you up to date with the latest evidence, guidelines and developments relevant to General Practice'

*'thoroughly enjoyable. Just as relevant to me as a GP in Ireland'
'truly amazing course! Imaginative, informative and relevant. Thank you!'
'an excellent course, a masterclass in the execution of teaching'
'absolutely the best GP course – thank you for coming to Ireland!'
'inspiring' 'motivating' 'empowering'*

This popular, highly acclaimed and independent **'Hot Topics'** course is designed to help busy GPs keep up to date with the recent key developments, evidence and guidelines that are relevant to our daily work. It is now the single most popular course for GPs in the UK and following two recent and very successful Irish courses **we are delighted to offer this course again in Autumn 2008 in Dublin**. The material is relevant to Irish GPs from both sides of the border. The course is prepared and presented by fellow GPs and gives an accessible digest of the recent literature, based on what we 'need to know' in the reality of daily General Practice. It is completely independent from pharmaceutical sponsorship and is ideal for the following groups:

- **Busy, working GPs wanting an update of recent developments and the literature**
*'as a full time GP it's a fabulous way to keep up to date'
'delivered by GPs for GPs; it is exactly what we GPs need'*
- **Candidates preparing for exams**
'very useful for MICGP' 'best revision tool I have seen for nMRCGP' 'not only as a GP, but as a course organizer and RCGP examiner I think this course is great'
- **For CME, CPD, CQA and preparation for appraisal**
'Should be essential CME for every GP.'
- **Doctors returning from maternity leave or career-breaks**
'stimulating, and I feel excited about going back to GP after 2 years out. Thank you!'
- **Trainers** *'As a trainer, I keep coming back – excellent, and I recommend it to all'*

The material is constantly up-dated with emphasis on the most **recent developments** making it suitable for delegates who have attended in previous years (*'My 5th time – brilliant and different again'*). Simon and Barrie are working GPs who are experienced teachers and lecturers. They are aware of the need to balance information with a pragmatic approach that is relevant to primary care and aim to make the day as entertaining, relaxed and enjoyable a learning experience as possible. Accompanying the course is a detailed and bound booklet with information summarising all the **'Hot Topics'**.

Please see our web-site www.nbmedical.co.uk for more information.

'stimulating, informative, infinitely useful'
'Absolutely excellent! Incredibly well researched, enthusiastic presentation'
'the best course I have ever attended'
'optimistic, stimulating and enjoyable'
'this is the fourth time I have attended and it has never failed to inform and inspire'
'A highly professional course – great mix of facts and humour'
'wonderful to be taught by fellow GPs rather than specialists', 'worth every penny!'
'inspiring – I wish I'd been taught like this 10 years ago!'
